

JLG Forklift Part

JLG Forklift Part - Following retirement in the late 1960's, John L. Grove embarked on a cross country RV expedition. After spending numerous years establishing his family built crane company with his brother, John had no idea that this journey would give birth to the rise of JLG Industries, Inc. The world leader of mobile aerial work platforms and precision material handling technologies was the end result of a road expedition.

While on their journey, John spent time talking to past business contacts whom the Groves stopped to see along the way. These conversations combined with a tragic occurrence-two workers being electrocuted on scaffolding when the Groves were traveling to the Hoover Dam- John discovered a vast marketplace for a product that could quickly and safely lift people in the air to accomplish maintenance and other building functions.

Following their return from vacation, John set up a joint venture with two of his friends and obtained a metal fabrication company in McConnellsburg, Pennsylvania. Opening with a small crew of twenty employees, they fashioned and sold their first JLG aerial work platform in 1970. The company incorporates some of the basic design essentials of that original lift into existing models.

JLG lift trucks have come a long way since Mr. John L. Grove returned to town from his cross-country road trip and since the initial aerial work platform debuted on the market. Today, the business proudly continues to expand itself into a range of markets worldwide and develops new products to make sure customers are capable of being more effective and perform in the workplace within a safer atmosphere.
