

## Aerial Work Platforms

Aerial Work Platform - There are a variety of lift truck accessories existing on the market. They can help transform your forklift so that you could expand your ability to pick objects up or complete clean up tasks and material handling with less effort.

Many of the accessories are particularly designed so as to fit on the forks themselves. Blade extensions for example, are used if you require a lot more fork length, which increases lifting capacity. Blade extensions come in lengths ranging from 48-120 inches. Rounded or triangular attachments are another variety utilized when transferring rolled material so as to make certain it does not roll off of the traditional flat forks.

Examples of lifting attachments consist of pivoting and telescoping crane or boom accessories. They can come in several various kinds and are normally meant for moving lumber, poles, metal bars and other sort of bulky objects. Other attachments like various styles of hooks and hook plates are available in order to pick up items with a sling or chain. Slab lifters and magnetic filters are other objects which can be utilized together with hook attachments. Slab lifters are specialized attachments that are designed for carrying different materials which are delivered in a slab or sheet format. Carpet poles and rug rams are other lifting tools which attach to your lift truck to be able to make moving rolls of carpet much easier. The accessory connects onto the forklift's blades and has a pole which goes through the center of the carpet roll.

There are various kinds of lift truck attachment intended for facility maintenance like for instance snow blades. These industrial forks could be attached to front end loaders and used for transporting materials like for instance dirt, and mulch as well as snow. Other common cleanup accessories consist of magnetic sweepers and standard sweepers. Standard sweepers consist of a broom which the lift truck forks connect onto for sweeping large spaces like parking lots or warehouse and factory floors. The magnetic sweeper is similar except that it has a magnetic plate instead of bristles. The magnetic sweeper is used in areas where there is lots of metal fragments such as on shop floors for example. Sweepers have widths as much as sixty inches and this surface area makes clean up effortless and fast.

Material spreaders are other accessories used on forklifts. These spreaders are useful for a range of applications like for example spreading pellets, fertilizers, insecticides, seeds, ice melt and rock salt.

Another optional lifting accessory are work platforms. These could be utilized by numerous various businesses everyday. Platforms may range in size from 36" x 36" to up to 60" x 60". A few models may be available and are capable of folding up and storing into a smaller place. Work platforms are designed to raise workers up to an overhead location using the lift truck. Larger platform models have additional space for workers to be able to carry tools and other essential things intended for the job. Often work platforms are made of poly material or steel.
