

## Barrel Clamps

Barrel Clamp - Known as "Barrel Clamp", this particular hydraulic accessory is actually utilized on forklifts in order to clutch objects that you need to move using the lift truck. Normally, they're used so as to handle kegs, paper rolls and barrels, with some barrel clamp designs being able to revolve the cargo. For example, the rotate function allows the person operating the forklift to put in a vertically stored paper inside the horizontal intake of a printing press.
